Abstract

I have the inspiration to made this sculpture from the memorial of happiness in the past. all I have done with my family memorial, feeling, emotion, from childhood. I picked the tools that My family usually used for their daily life. All the equipment already have their unique shape from each one. I tried to transform the material to made it more interesting and meaningful by adapted with different shape and design to make it aesthetic

Problem Statement/ Statement Significance

I'm from the country side. I have grown up in a small village and small family but very happy. I have seen all the activity in country side since I was a little. My family are working and raised me at the same time. They always giving me good lesson outside the class room. Giving me best example how to live life with happiness. They were working very hard but they are the most happiness people that I ever met. So, every time I went to work with them in the field. I always enjoy my self let imagination blown up. I was impressed and had a wonderful memorial.

Objective / Aim

This art work compositing the material for imagination and expressing my feeling for sculpture
